## **PURCHASE ALL YOUR SIMMENTAL BULLS AT ONE TIME TO SAVE ON TIME AND TRAVEL COSTS**

### **TIGHTEST ENTRY CONDITIONS FOR ANY SIMMENTAL BULL SALE IN QUEENSLAND AND POSSIBLY AUSTRALIA:**

- All bulls entered are 8/8 registered purebred with the Simmental Association of Australia or Fleckvieh Association of Australia to guarantee buyers of hybrid vigour which is critical for an F1 cross.
- All bulls DNA verified to sire and tested Pesti-Virus Free
- All bulls Vet Checked, Semen Tested, Mouthed and Scanned
- No body clipping or hoof trimming on all Bulls
- Minimum vaccinations. 3 Germ Blooded (Tick Fever), 7-1, 3-day and Botulism
- All studs minimum JBAS 6
- Strict minimum and maximum weight limits apply to prevent the sale becoming a feeding contest
- 34 interstate bulls acclimatised in Central Queensland for 3 months prior to sale
- Bulls previously advertised for sale are ineligible for inclusion in the sale

# VISION FOR THE SALE

*The preferred place to buy and sell Simmental Bulls in Australia*

In 2017 a number of Simmental Breeders saw the need for one Simmental Bull sale based close to the Fitzroy Basin in Queensland. The sale provides buyers the opportunity to purchase all of their Simmental Bulls at one time saving on both travel costs and time whilst also providing access to new and varied genetics.

Foundation vendors also identified that sale conditions needed to be extremely tight to ensure that only the highest quality of bulls are offered and that ongoing participation in the sale needed to be based on performance (selling average and clearance rates).

Initially most Simmental Studs in Queensland were invited to participate in the sale to sell bulls, promote their existing sales and promote the Simmental Breed in general. Ultimately for a variety of reasons the majority of these studs chose not to participate. In hindsight this proved of benefit to the sale as it allowed Australia Wide participation thereby increasing diversity of genetics offered to the astute bull buyer.

## SALE LOCATION - CQLX

CENTRAL QUEENSLAND LIVESTOCK EXCHANGE, GRACEMERE

*One modern facility combined with some of Australia's oldest Simmental Studs*

The Queensland Simmental Bull Sale selected the Central Queensland Livestock Exchange (formerly known as the Gracemere Saleyards) as the preferred selling complex for the sale given its closeness to the Fitzroy Basin and it's modern facilities. The complex commenced operations in January 1953 and is situated 8 kms west of Rockhampton on the

Capricorn Highway leading to the Central Highlands and the Central Western centres of Barcaldine, Blackall, Longreach and Winton. The facility has the capacity to sell over 5000 head of cattle each week at its Wednesday Prime/Store Sale and includes a café, function room, feedlot and dedicated spelling yards.

All bulls are available for viewing from Sunday 1<sup>st</sup> August at the selling complex.

Independent or personal viewing of all lots is also available at request.

To arrange a guided personal viewing (available from Saturday evening) contact one of the selling agents or Stud Stock Marketing Services on 0416 229 171.

# VISIT ROCKHAMPTON & GRACEMERE

Rockhampton (often referred to as RockVegas as locals) is well known as "the Beef Capital of Australia" and this is validated because it was selected as the location for Beef Australia - a major international event for the cattle industry. Our fellow cattle producers at Casino (NSW) continue attempting to claim the title of the Beef Capital for their town - they might be talking but no-ones listening and on top of that everyone knows a "Casino" is smaller than "Vegas".

The location of the sale at Gracemere (a leisurely twenty-minute drive from Rockhampton) is perfectly situated for interstate travellers as Rockhampton also includes a significant airport with routes easily accessible throughout Australia.

A visit to Rockhampton to attend the sale is also a great opportunity for the family with beaches 45 minutes away at Yeppoon or Emu Park. A variety of other tourist destinations are also in close proximity including Great Keppel Island and the historical town and mine at Mount Morgan.

Rockhampton is also home to the Stockland Shopping Center which has a variety of retail outlets offering products not available within remote Queensland. Numerous accommodation offerings exist both at Gracemere and Rockhampton suitable for most budgets.

# SIMMENTAL BULLS FOR SALE FROM QUEENSLAND & AROUND AUSTRALIA

The sale includes bulls born and raised right here in Queensland but also includes animals from high performing studs from other states. Knowing that commercial beef producers often travel Australia Wide to source new and different Simmental genetics (outside of those readily available in Queensland) the Queensland Simmental Bull Sale has brought those bulls right here to save time and travel costs. These vendors include some very well-known Simmental breeders including three of the longest established and one of the most highly regarded Simmental breeders in Australia. The sale also includes a number of significant commercial beef producers who have vertically integrated their operations to include their own Simmental Studs.

Over seventy percent of the studs involved in the sale were selected to participate on the basis that they have demonstrated performance by meeting or exceeding the industry sale averages and clearances rate for their bulls over a number of years. Twenty percent of stud vendors were selected as they run a significant scale beef production enterprise and have launched their own cattle stud and truly understand commercial beef production. The last ten percent have been selected to support new breeders in accessing an appropriate market and to keep the stud breeding sector competitive and continually improving.

## BULL PREPARATION & ACCLIMATISATION

A large number of the bulls presented in the sale are from vendors based in Queensland and this can be referenced in the participating studs section. These studs include multiple Queensland vendors (some located in heavy tick country) and a number of interstate vendors who have completed the last stages of bull preparation in Queensland.

Strict instructions on feeding programs and desired weight have been provided to all vendors to ensure bulls are not over prepared and are ready to work.

Given the timing of the sale many bulls will be spelled prior to a controlled joining later in the season whilst others simply go straight to work. The timing and conditions of the sale have been selected to suit Queensland Commercial Cattle producers many of which have been buying Simmental Bulls from southern states for years.

# SALE TERMS & CONDITIONS

- Online bidding and viewing of lots will be available via Stock Live: [www.stocklive.com.au](http://www.stocklive.com.au)
- The Auction will be conducted under the Australian Livestock & Property Agents Association (ALPA) Livestock Auction Terms and Conditions Of Sale. These terms and conditions are displayed in the main front office of the CQLX selling complex. Compliance with sale terms and conditions is the responsibility of individual vendors.

*To view these Terms and Conditions go to: <http://www.alpa.net.au/UserFiles/File/Documents/ALPA%20Livestock%20Terms%20and%20Conditions%20FEB%202017.pdf>*

- Insurance Representatives will be in attendance on sale day and we recommend that buyers intending to insure their purchases do so from the fall of the hammer.

Nutrien Insurance is the preferred insurer for the sale and will be on site to arrange insurance for Bulls.

- **GUARANTEE:** All bulls come with a six month structure and fertility guarantee. In the case (supported by a Veterinarian Report) that a bull is found to be incapable of natural service or infertile, the selling stud vendor will replace the bull or provide a credit (less disposal proceeds) to the buyer for future purchases from the stud vendor. This condition is provided on the basis that the problem was not caused by injury or disease incurred post fall of the hammer at auction. The sale as a separate entity assumes no responsibility for individual bulls or vendors.
- **CATALOGUE DISCLAIMER:** All reasonable care has been taken by the vendors to ensure the information provided in the catalogue is correct. However the vendor and selling agents do not give any warranty as to errors or omissions. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the information provided.

After more than 40 years breeding in Goomeri, Queensland, Nangur Simmentals pride themselves on quiet, fast growing and fertile cattle suitable for the commercial cattle producer.

When you are on a good thing stick to it and Nangurs breeding objectives since 1985 remain the same today "to produce fast growing fertile and gentle bulls along with females known for their high pregnancy rate and calving ease". After 35 years Nangur females have a high fertility rate. The Stud Principal is also very particular about such important features as correct eye pigment, structural correctness and sound feet.

**NARACOORTE SA 5271**

Yerwal Estate Simmental stud is a 600ha grazing property situated 45kms south west of Naracoorte in South Australia in 1963.

By the mid 80s Yerwal Estate was running 250 to 300 pure bred Simmental females and participating in an annual bull sale at Millicent. Yerwal saw great success in this sale, topping the average 4 out of 5 years. For a number of years Yerwal Estate has been selling bulls to many different parts of the country including the south-east of South Australia, Victoria, Central and Northern New South Wales, Northern South Australia, Northern Territory, Central Queensland and far Western Queensland. The stud has also sold embryos to central Queensland and has a good understanding of both the genetic and nutritional preparation requirements for cattle going into these climates.

Yerwal Estate aims to produce bulls that are sound, moderate framed, easy fleshing, athletic, soft and well pigmented. Yerwal Estate bulls are good footed, sound structured animals that will stand up on any soil type barring injury.

Quentin and Renee Mooney  
0438 011 800  
renee@mtmooney.com.au  
Tintinara, SA, 5266

Mt Mooney Simmentals was established in 2008 after trialling many different British & European cattle breeds in their own commercial beef operation. Ultimately Quentin and Renee landed with the Simmental breed as it possessed not only the desired attributes for their commercial beef operation but also aligned with the desire to enter the stud breeding market.

In addition to its stud stock enterprise Mt Mooney currently runs 200 commercial beef cross cows producing progeny for the milk vealer trade on two properties in the upper south east of South Australia (Tintinara). This commercial focus has enabled Mount Mooney to produce Simmental bulls that achieve exceptional carcass results.

#### COMMENTS

Quicksand has some serious breeding potential. Polled, heavy boned, powerful with a great temperament. A full ET brother and a ET maternal half brother were sale toppers this year to well known studs, with two ET maternal half brothers offered in this sale. Predictable bloodlines on offer.

BUYER: ..... PRICE \$ .....

Courtney and Joel  
0476 639 925

thewilgassimmentals@outlook.com  
160 Lees Rd, Duri NSW 2344

The Wilgas comprises the best animals retained from what was formally known as the Lavarta Simmental Stud along with selected genetics bred and/or purchased by Joel Trim and Courtney Newlands. Their herd consists of predominantly Traditional Simmentals and includes many influential and desirable genetics well known within the Simmental Breeding Industry.

The Wilgas believes that the Traditional Simmental has a bright future as the preferred cross of choice over high grade Bos Indicus cattle and the Wilgas are dedicated to breeding for the all important Queensland market. The Wilgas has also established an impressive battery of AI Sires which will become a focus in the coming years and Joel and Courtney look forward to presenting bulls with some exciting new genetics suitable for the Queensland commercial or stud cattle producers in the years to come.

## VENDOR PROFILE: Grangeburn Simmentals

**Brodhi Carracher**  
 0418 723 996  
 brodhicarracher@hotmail.com  
 Glenelg Highway  
 Wannon VIC 3301

Registering the prefix in 2013, Brodhi Carracher set home base for Grangeburn Simmental in Victoria's south-west at Wannon where extremes in season occur from scorching dry summers to waterlogged green winters. These conditions test the cattle year-round as they need to perform in the good times and the poor times.

Based on almost 700ha of grazing country, Grangeburn is currently running a commercial cow/calf operation alongside the seedstock operation of 120 registered Simmental and SimAngus females. On top of this the sheep enterprise produces prime lambs. No stone has been left unturned in the quest for genetics to breed the 'right type' for clients in both the northern or southern hemispheres. If it fits it is incorporated into the herd.

Grangeburn are in the industry to produce top end bulls for the astute cattlemen with value for money. Breeding traits are focused on mobility, durability, easy fleshing, slick skinned and well pigmented cattle with maternal calving ease.

To allow the cream to rise to the top with the above traits in mind Grangeburn prefers bulls to be run as one contemporary group from birth through to sale with minimal grain in their diet. The cheapest feed to produce per kilogram of dry matter is grass, so that's what Grangeburn cattle get until the scorching summer heat when they are given access to silage and low grain content pellets.

### Grangeburn Quidditch (P)

**ID** ZEUPQ050  
**DOB** 13/04/2019  
**SIRE** Grangeburn Masters Pride (PP)  
**DAM** Juraley H128

**COMMENTS**

Quidditch is an early maturing, soft skinned bull with a ton of muscle packed into his moderate frame. Derived from a very strong cow family which has produced a number of great progeny from this cross. Look for this bull to sire offspring who reach target weights quickly!

### Grangeburn Quizmaster (P)

ID ZEUPQ052  
DOB 23/04/2019  
SIRE Grangeburn Masters Pride (PP)  
DAM Woonallee Fiorenza G239 (P)

#### COMMENTS

Length and strength describe Quizmaster. Added frame to this soft skinned sire, another great son of Masters Pride who's son Quantum of Solace (P) sold to Lucrana Simmentals early in 2021.

BUYER: ..... PRICE \$ .....

**Grangeburn Que Sera**

**ID** ZEUPQ075  
**DOB** 18/08/2019  
**SIRE** Woonallee Muscleman (P)  
**DAM** Juraley Ellen (P)

**COMMENTS**

Note the change in age to this well framed younger sire, his dam was a donor for us and was still in the herd in 2020 at 11 years old until an untimely death - structurally Que Sera will hold up and is extremely mobile.

BUYER: ..... PRICE \$ .....

**VENDOR PROFILE: Summa Simmentals**

Jack and Tara  
 0400 718 481  
 dumma10@bigpond.com  
 "Emoh Ruo" May Downs - Carfax  
 Road Middlemount QLD 4746

Jack and Tara Dumma ('Emoh Ruo', Middlemount) own and operate a mixed farming operation in Central Queensland which includes breeding, backgrounding and fattening the progeny of a 2,000 head commercial Brahman based female herd. After many crossbreeding trials to improve the profitability of their beef operation the switch was made to using Simmental Bulls. Since that time, it has been the crossbreed of choice in their operation over Brahman females. It was also the start of a love and appreciation of the Simmental Breed and led to starting Summa Simmentals.

## VENDOR PROFILE: Daraabah Fleckvieh Simmentals

**Bruce and Melinda McColl**  
0429 750 590

[bruce@daraabah.com.au](mailto:bruce@daraabah.com.au)

7R Jones Creek Road  
Dubbo NSW 2830

We are a family operation running a 120 stud breeder herd on properties at Dubbo and Merrygoen in Central West New South Wales. We first began using Simmental cattle in the 1980's when we purchased bulls to put over our commercial cows. We were so impressed with the F1 progeny who were weaned and sold straight off their mothers at 8 -9 months of age. They always topped the market because they had reached on average 400kg, were soft, well-muscled and docile and clearly met the market specifications. The heifers weren't disadvantaged price wise either because they were always keenly sought after for F1 mothers due to their excellent maternal ability.

With the market for our bulls being predominantly Central Queensland and North West NSW we believe the bulls we are producing are very suited to these conditions and markets. With conditions frequently tending on the dry side we have selected for medium framed animals rather than the bigger rangier types. We like to see our bulls well- muscled but they must also have the softness to be able to finish within the market specifications. With the increasing demand for Simmental 1st cross females another important factor for us are the maternal traits of the breed. We select for high milk, high fertility and sound udders.

**VENDOR PROFILE: Lone Station Simmental Stud**

**Steven Manwill**  
 0416 229 171  
 smanwill@pharosinvestments.com.au  
 1154 Kipper Creek Road  
 Biarra, QLD 4313

Lone Station Simmentals quickly established themselves as providing highly desired, commercially focused Simmentals Bulls for selective joining with high bos indicus content cattle for the Queensland Commercial Cattle Producer after only ten years.

Lone Station Simmental Bulls are known for a clean coat type, consistency in growth, structural correctness, sound feet and being bred in heavy tick coastal country. Lone Station Simmental females have been carefully selected for calving ease, fertility, growth rate of progeny, clean coat type and eye colouring/pigmentation

Lone Station Simmental Bulls are working today in commercial herds all across Queensland at locations including Banana, Marlborough, Moura, Sarina, Nebo, Theodore, Charters Towers, Clermont, Alpha and more.

Lone Station Simmental Stud has sold stud sires and females to numerous Queensland based Simmental Stud operations (including two of the oldest established). Lone Station Bulls are also often sort after for commercial cattle operations in heavy tick and lantana country.

2020 saw Lone Station Simmentals unable to supply enough bulls to meet demand from existing and new clients.

**Lone Station Quattro (P)**

**ID** LSNPQ106  
**DOB** 28/03/2019  
**SIRE** Clay Gully Jayco (P)  
**DAM** Lone Station Lily

**COMMENTS**

Quattro has already done one seasons work (4 months) as a young bull over stud breeding females. Performance data shows even and consistent growth over a long and light preparation . Quattro has been easy to manage, has handled a high tick load and tough drought conditions well.

#### COMMENTS

Dam is a led heifer purchased from Lucrana and has shown herself to be a consistent early calver every year. Full brother was sold to a well established/well known/long term buyer of Simmental based in Moura who is extremely happy with the results in their Bos Indicus X commercial herd.

BUYER: ..... PRICE \$ .....

## VENDOR PROFILE: Tullayr Simmentals

George Wragge  
0410 014 754  
tullayr@gmail.com  
PO Box 281, Scone NSW 2337

Tullayr Simmentals is a family run Simmental Stud located just North of Scone in the Upper Hunter of NSW. As a family operation, George, his wife Georgia and parents Liz and Mike all contribute to the stud's success. Tullayr prides themselves on having honest cattle with outstanding temperaments suitable for a wide range of cattle markets.

Tullayr Simmentals consistently places bulls into local herds through paddock sales, whilst also selling successfully through multi-vendor bull sales into the Northern Rivers of NSW and Central Queensland cattle markets for close to a decade. Our inclusion in the Queensland Simmental bull sale further cements our commitment to the Queensland cattle market.

A commitment to sourcing leading genetics has led Tullayr to invest heavily in the cow herd through ET and AI programs and this has accelerated endeavours to deliver a product we are proud to stand behind. Our clients breeding objectives is at the forefront in our minds meaning an animal needs the ability to get about on a structurally sound set of feet and legs, be sleek coated and well pigmented, largely polled, moderately framed all with a quiet temperament. All calves are weighed at birth and along with continued objective measurements and strict physical selection. Buyers can be assured that Tullayr are presenting an animal that has had the guess work taken out of it.

**COMMENTS**

Qatar is again a young bull that is a later maturing type. His Dam has been a very consistant breeder, with many brothers having sold into the Qld and northern rivers of NSW. Qatar is well pigmented and has a wonderful blonde coat type.

BUYER: ..... PRICE \$ .....

**VENDOR PROFILE: Jarravale Simmentals**

Run by fifth generation cattle producers, Jarravale Simmentals aspire to produce excellent quality Simmental genetics that will produce more beef for farming operations to enhance their profitability. Jarravale Simmentals is located near Kyogle on the Far North Coast of NSW with a breeding herd of over 100 registered females. During the past decade Jarravale Simmentals has seen increasing demand for quality bulls from both their local market and the wider Simmental community.

The Jarravale breeding program is focused on consistent, high-performing female lines that are fertile, structurally correct and wean heavy calves. Jarravale believes that the cow herd is the driver of performance in the beef industry. We select for industry relevant traits including: calving ease, carcass weight, fat coverage and performance on grass and grain. To achieve our goals we have and continue to heavily use embryo transfer and artificial insemination. To continue to improve our cow herd we source the best sires we can find globally that are backed by strong female lines and display the traits that our commercial clients require to put more money in their back pocket.

Our commitment to sourcing leading global genetics is demonstrated by travelling to visit leading Simmental cattle studs in North America and selecting embryos and semen from the lines that we believe will suit our Australian conditions.

**0427 800 522**  
**springside@skymesh.com.au**  
**357 Irongate Rd**  
**Springside QLD 4356**

Since the birth of our first Simmental calf in 1975 we have seen the Simmental breed slowly gain popularity within Australia and Springside has continually evolved and adapted over this long period. The Simmental has proven itself again and again and has shown that both bulls and females can produce quality, weighty offspring that ultimately result in better returns for the commercial breeder.

Springside Simmentals is owned by Peter and Toni Rauchle at "Springside" near Pittsworth QLD. Springside currently run around 150 breeders from which they have sold bulls and females throughout the Eastern States of Australia for many years

Today's Springside Simmentals and their crosses produce earlier finishing calves, have great weight-for-age, muscling and carcase yield attributes and have all the benefits synonymous with the Simmental Breed.

Springside is one of Queensland and Australia's oldest Simmental Stud Breeding Operations.

 springvale2@bigpond.com  
 96 Lamperds Road, Memerambi, QLD 4610

Founded by brothers Mike and Rob Introvigne and their wives Julie and Diane the Bonnydale Black Simmental Stud began in Western Australia in 2005. 2016 saw Jake Berghofer and Emma Patterson expand the operation into Queensland with Bonnydale now running a combined herd of nearly 600 Black Simmentals and 1000 available recipis across two states.

Bonnydale has a partnership with a United States based stud operation and Bonnydale truly is a National Black Simmental Brand. With annual sales on property in Bridgetown WA, at the Roma Saleyards and CQLX Gracemere (QLD) with paddock bulls available all year round Bonnydale Black Simmentals are easily accessible.

Bonnydale has a large pool of genetics working in varied climatic conditions (over 600 Black Simmentals entered on both Australian and the United States breed registers) and 1000 available recipis across Western Australia and Queensland. This means that the selected 160 bulls Bonnydale offers to market each year are of extremely high quality. These same bulls align with a breeding program geared towards calving ease, efficiency in growth, early maturity and a distinct end product value.

Bonnydale animals are matched with whole herd performance measurement (utilising Breedplan), genomic testing, DNA verified pedigrees and genomic enhanced EPDs. All calves are weighed at birth and calving ease recorded. Weaning weights are recorded at 200 days (docility is also scored) with weights measured again at 400 days. Bulls are also scanned for eye muscle area, rib and rump fat and intramuscular fat (IMF- "marbling"). All bulls have scrotal measurement taken to measure female age of maturity with cow weight and hip height measurement recorded to provide data relative to female production efficiency.
